KANMANI S

Java Backend Developer | Spring Boot · REST APIs · MySQL · PostgreSQL · Apache Airflow

Chennai, India | +91 9242437282 | kanmanisenthil19@gmail.com | linkedin.com/in/kanmani-s-6192a2383

PROFESSIONAL SUMMARY

Java Backend Developer with **2 years** of experience building enterprise applications with **Java, Spring Boot, and REST APIs** on **MySQL and PostgreSQL**. Delivered **20+ modules** in an HRMS platform with end-to-end ownership, from requirement analysis and **database design** to API development, **unit testing** and **production support**. Built **Apache Airflow pipelines** (Bronze, Silver, Gold) and backend services feeding an **LLM-based platform**. Strong in **logical problem solving**, **API validation**, **SQL optimization** and **fast bug resolution**. Uses **Claude Code and AI tools** to deliver features faster; learning **Generative AI and LLMs**.

CORE SKILLS

Backend: Java, Spring Boot, Spring MVC, REST APIs, JDBC, API Validation
Core Java: OOP, Collections, Multithreading, Exception Handling
Databases: MySQL, PostgreSQL, SQL Query Optimization, Data Modeling
Data Pipelines: Apache Airflow (DAGs, scheduling), Bronze-Silver-Gold layers, Object Storage
Frontend (working knowledge): React.js, Node.js
Tools: Git, GitLab, Maven, Gradle, Postman, STS
Practices: Unit Testing, Debugging, Production Support, Documentation
AI-Assisted Development: Claude Code, Prompt Engineering; learning Generative AI and LLMs
Also: Python, SQL

PROFESSIONAL EXPERIENCE

Java Backend Developer | *OASYS Cybernetics Private Limited* | *2024 – Present*

- Built and maintained **20+ modules** (Attendance, Leave, Shift, Employee, On-Duty, Document Management and more) using **Java, Spring Boot, and REST APIs**.
- Developed the HRMS backend from the **Login API** onward, including **Employee Profile APIs** (basic details, passport, family, social profile, emergency contact).
- Built **Self-Service modules**: Leave (apply, approve, reject, cancel), On-Duty, Out Pass, Comp-Off, Holiday support, Attendance requests, **Shift Management** and **Task Assignment**.
- Designed **RESTful APIs** with business logic and **validation** for enterprise workflows across all projects.
- Built **automated approval workflows** (manager approve/reject, employee cancel), reducing manual approval effort.
- Developed **multiple schedulers** (late-order, biometric) and **automated email flows** for every module, including birthday and meeting-schedule mails.
- Built **MD and Employee dashboard APIs** and **master data APIs** (add, update, delete) for dropdowns stored in dedicated tables.
- Built **Apache Airflow pipelines** across Bronze, Silver and Gold layers with scheduled and manual runs.
- Analyzed tasks logically, chose suitable **DB data types** and wrote **unit tests** before delivery.
- Optimized SQL queries on **MySQL and PostgreSQL**, improving performance and data processing.
- Fixed bugs quickly and resolved **production issues across 3 live projects** with QA and deployment teams.
- Used **Claude Code and AI tools** to speed up feature development.

PROJECTS

HRMS Portal Application | *Java, Spring Boot, REST APIs, MySQL, React.js*

- Developed the backend for **20+ modules** from the **Login API** onward, covering **Employee Profile** (basic, passport, family, social, emergency contact).
- Built **Self-Service** modules: **Leave** (apply, approve, reject, cancel), **On-Duty, Out Pass, Comp-Off, Holiday**, **Attendance requests**, **Shift Management** and **Task Assignment**.
- Implemented **automated approval workflows**, **schedulers** (late-order, biometric) and **email flows** (birthday, meeting scheduling) across modules.
- Developed **MD and Employee dashboard APIs** and **master data APIs** (add, update, delete) for dropdown values.
- Optimized SQL for faster data processing, wrote **unit tests**, fixed bugs and provided **production support**.

OASYS Enterprise Data Platform (OEDP) | *Java, Spring Boot, REST APIs, PostgreSQL, Apache Airflow, Node.js*

- Built **Airflow DAG pipelines** (Silver to Bronze, Bronze to Silver, Silver to Gold), one DAG per pipeline, with **scheduled or manual** runs.
- Stored pipeline outputs in **object storage**.
- Implemented **multithreaded list operations** for faster processing.
- Built DB and source **connection services** and **native-query rules** supplying data as input to an **LLM**.
- Implemented **API validations**, integrations, enterprise workflows and resolved issues.

UP Excise Project | *Java, Spring Boot, REST APIs*

- Analyzed project structure and queries during onboarding.
- Fixed bugs and resolved **production issues** in a **government** application.

EDUCATION

Bachelor of Commerce (General) | Valliammal College for Women, Chennai | 2021 – 2024

CERTIFICATION

Java Full Stack Development | Apollo Computer Education Ltd
